ALT-INK ACADEMY • SHEET 11: DARK BAROQUE LACE, CORSET & SUNBURST

Hardware: Poseidon Pen 3.5mm • 1205RL Fineline & Micro-Dots • 1207RM Whip Shading

50 mm THERMAL SCALE BAR (1:1)

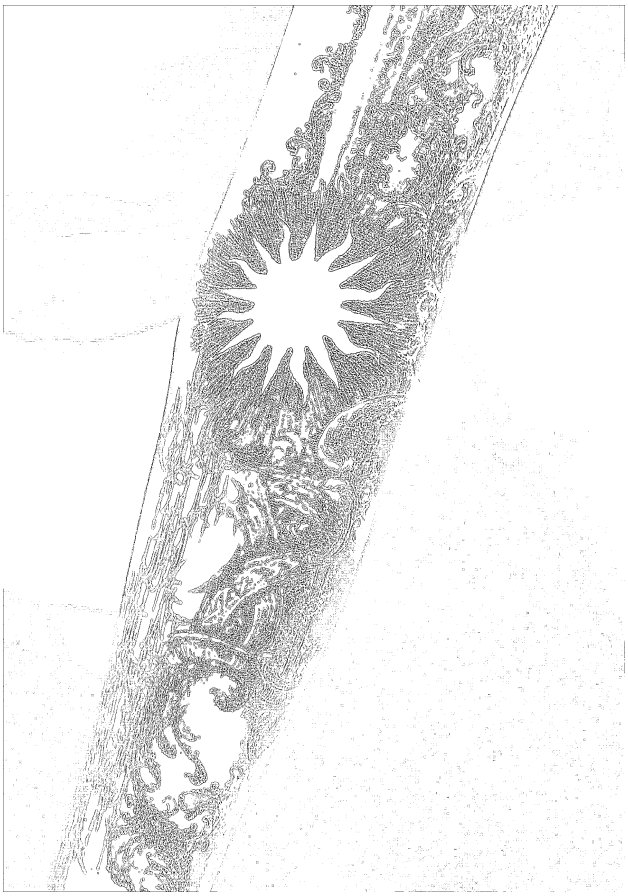

1. GOTHIC THIGH GARTER LACE & 3D CORSET LACING

Fine-mesh net, floral acanthus border, and overlapping ribbon eyelets with hanging bow ties.

2. NEGATIVE SPACE SOLAR BURST

Leave the core sun untouched skin. Radiate dense engraving rays outward.

3. MACABRE SKELETON & THORNS

Woodcut ribcage anatomy intertwined with barren forest branches.

ALT-INK ACADEMY • SHEET 11: DARK BAROQUE LACE, CORSET & SUNBURST

Technical Execution Guide & Biomechanical Placement Rules

50 mm THERMAL SCALE BAR (1:1)

TECHNIQUE	CARTRIDGE	VOLTAGE	ANGLE	HANG	EXECUTION SECRET
Lace Mesh Diamond Grid	1205RL	7.0 V	75°	1.5 mm	Single unbroken diagonal passes; keep intervals strictly equal.
Corset Eyelets & Rings	1205RL	7.2 V	80°	1.5 mm	Tiny precise circles; rotate synthetic skin for roundness.
Corset 3D Ribbon Ties	1207RM	5.8 V	45°	1.8 mm	Dark shading under the ribbon crossing creates realistic depth.
Sunburst Flare Rays	1205RL	7.2 V	70° → 85°	1.8 mm	Whip out from negative core; feather tips into surrounding black.
Dense Black Engraving	1207RM	6.2 V	80°	1.8 mm	Solid pack background around radiant sun for maximum contrast.
Skeleton Bone Texture	1205RL	6.8 V	70°	1.5 mm	Renaissance contour hatching following ribcage curvature.

1. The Negative Space Secret (The Sunburst Law):

In blackwork and dark ornamental, what you DON'T tattoo is more powerful than what you tattoo. The radiant sun center must remain 100% untouched virgin skin. Apply a thick bead of vaseline directly over the negative sun to repel stray ink during cleaning.

2. Anatomical Flow for Thigh Garters & Corsets:

The thigh is an inverted cone. When wrapping a lace band around the leg, curve the stencil template slightly upwards on the outer hip. This compensates for leg perspective so the garter appears perfectly horizontal when standing.

3. Delicate Fabric Illusion (Micro-Dipping):

For lace netting and sheer lingerie fabric, dip the needle in greywash cup 2 (30% ink) or tap off all heavy black. Heavy black will bleed across the tight net diamonds and muddy the delicate fabric texture.

4. Skeletal Woodcut Hatching Technique:

Human bones have porous, grainy texture. Mimic old master engraving (Albrecht Dürer) by alternating short dashes with continuous contour lines following the cylindrical sweep of each rib.
